

Pressure limiter for multiple actuators

ÜB...A2
NB...A2

5.07

DUNGS®
Combustion Controls

Technical description

The pressure limiters ÜB...A2 and NB...A2 are compact pressure switches as per EN 1854 for DUNGS multiple actuators.

The pressure switches are suitable for switching a circuit on, off or over on changes in actual pressure value relative to the set reference value. The reference valve (switching point) can be set easily and quickly by means of a setting wheel provided with a scale without the use of a pressure gauge.

Application

Pressure switches for DUNGS multiple actuators GasMultiBloc and DMV double solenoid valve. Various mounting options directly on housing or by means of an adapter.

Standard mounting on valve housing on

the inlet side via threaded flange. Suitable for gases of families 1,2,3 and other neutral gaseous media.

Approvals

EC type test approval as per EC Gas Appliance Directive:

ÜB A2	CE-0085 AO 3220
NB A2	CE-0085 AO 3220

EC type test approval as per EC Pressure Equipment Directive:

ÜB A2	CE0036
NB A2	CE0036

Approvals in other important gas-consuming countries. Special designs for the North American market with UL, FM and CSA registrations.

Functional Description

Single-acting pressure limiters in the superpressure range.
The pressure limiters work without external energy supply.

Pressure limiters ÜB...A2 / NB...A2

The switching mechanism reacts to superpressure. The system is locked if the set reference value is exceeded

or undershot. After the fault has been remedied, the system can be put into operation only manually by actuating the unlocking device on the pressure limiter. The switching state „Locked“ is indicated by a neon glow lamp.

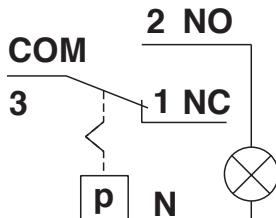

ÜB...A2: Switches on and locks if the set pressure value is exceeded.

NB...A2: Switches on and locks if the pressure is lower than the set pressure value.

ÜB...A2 switching function

As pressure rises

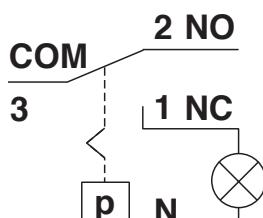

2 NO closes, 1 NC opens
Glow lamp ON, locked.

NB...A2 switching function

As pressure falls

2 NO opens, 1 NC closes
Glow lamp ON, locked.

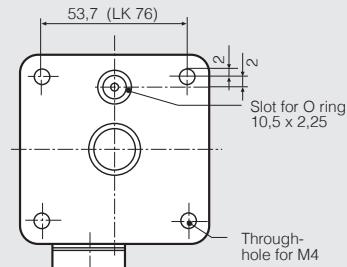

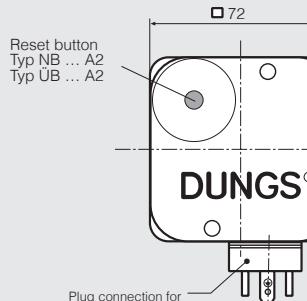

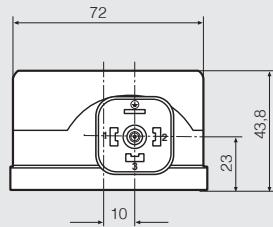

Operating state

Specifications

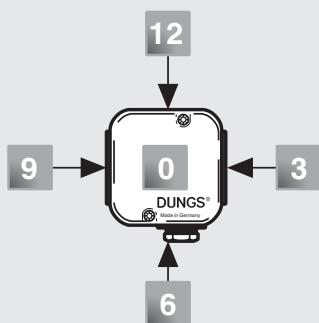

Max. operating pressure	NB...A2, ÜB...A2 NB 500 A2, ÜB 500 A2	500 mbar (50 kPa) 600 mbar (60 kPa)
Pressure connection	O ring flange connection on underside of pressure switch	
Temperature range	Ambient temperature Medium temperature Storage temperature	-15 °C to +70 °C -15 °C to +70 °C -30 °C to +80 °C
Materials	Housing Switch Diaphragms Switching contact	aluminium die casting polycarbonate NBR Ag
Switching voltage	AC eff. DC	min. 10 V min. 12 V max. 250 V max. 48 V
Nominal current	AC eff.	10 A
Switching current	AC eff. AC eff. AC eff. DC	max. 6 A max. 3 A min. 20 mA min. 20 mA at cos φ 1 at cos φ 0.6 max. 1 A
Electrical connection	Standard: Special design:	plug connection for line sockets as per DIN EN 175 301-803, 3-pin with protective contact at screw terminals via cable gland, PG11
Degree of protection	IP 54 as per IEC 529 (EN 60529)	
Adjustment	In vertical installation position NB...A2: when the pressure drops ÜB...A2: when the pressure rises If the installation position is different, take the switch point change into account.	
Setting tolerance	±15% switching point deviation referred to reference value	

Dimensions [mm]
