

# 4/3 directional control valve, directly controlled, with electrical position feedback and integrated electronics (OBE)

Type 4WRREH 6

Size 6

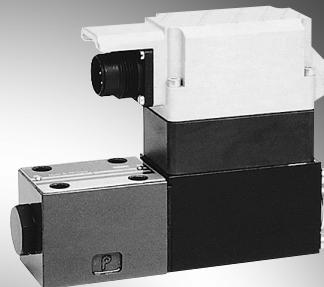

Component series 1X

Maximum operating pressure P, A, B 315 bar, T 100 bar

Rated flow 4...40 l/min ( $\Delta p$  70 bar)

RE 29041/03.10  
Replaces: 01.05

1/12

Type 4WRREH 6

## Features

- Directly operated high-response 4/3 directional control valve with control spool and sleeve in servo quality
- Double stroke solenoid with electrical position feedback and integrated electronics (OBE), calibrated in the factory
- Prepared pilot valve, among others for 3/2 control cartridge with position transducer, position-controlled
- Electrical connection 11P-PE signal input of differential amplifier with interface B5 ±10 V
- Use for electrohydraulic controls in production and test systems

<sup>1)</sup> Only in connection with flow characteristics "P"

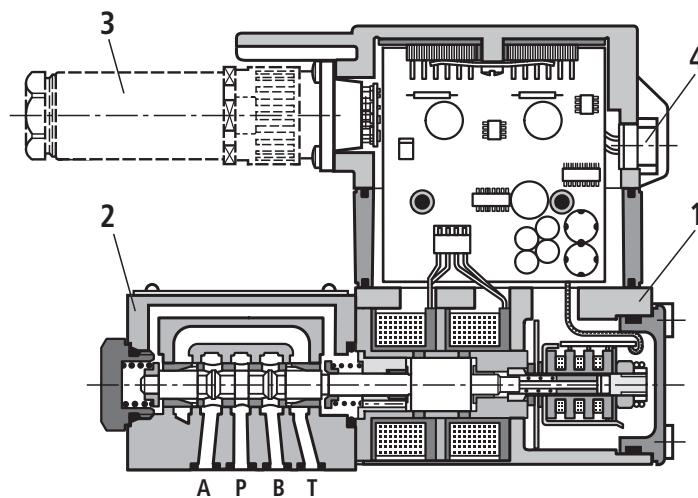

<sup>2)</sup> Inflection 60 % with rated flow "15" and "25",  
otherwise 40 %

## Function, section

### General

In the integrated electronics, the specified command value is compared with the actual position value. In case of control deviations, the double-stroke solenoid is activated which adjusts the control spool by means of changed solenoid force.

Stroke/control cross-section is controlled proportionally to the command value. In case of a command value specification of 0 V the electronics controls the control spool in center position. In switched-off state, the valve is undefined in P-B/A-T or P-A/B-T. Therefore, "additional isolation valves" are required in many applications and must be taken into account for the On/Off switching line.

<sup>1)</sup> The cleanliness classes specified for the components must be complied with in hydraulic systems.

Effective filtration prevents faults and at the same time increases the service life of the components.

For the selection of filters see technical data sheets RE 50070, RE 50076 and RE 50081.

<sup>2)</sup> Flow at different  $\Delta p$   $Q_x = Q_{\text{nom}} \cdot \sqrt{\frac{\Delta p_x}{35}}$

## Technical data

**electric**, control electronics integrated in the valve

## Technical instructions for the cable

### Version:

- Multi-wire cable
- Litz wire structure, very fine wire according to VDE 0295, class 6
- Protective earthing conductor, green-yellow
- Cu shielding braid

### Type:

- e.g. Oilflex-FD 855 CP (Lappkabel)

### Number of wires:

- Depends on valve type, plug type and signal assignment

### Line Ø:

- 0.75 mm<sup>2</sup> up to a length of 20 m
- 1.0 mm<sup>2</sup> to 40 m of length

### Outer Ø:

- 9.4...11.8 mm – Pg11
- 12.7...13.5 mm – Pg16

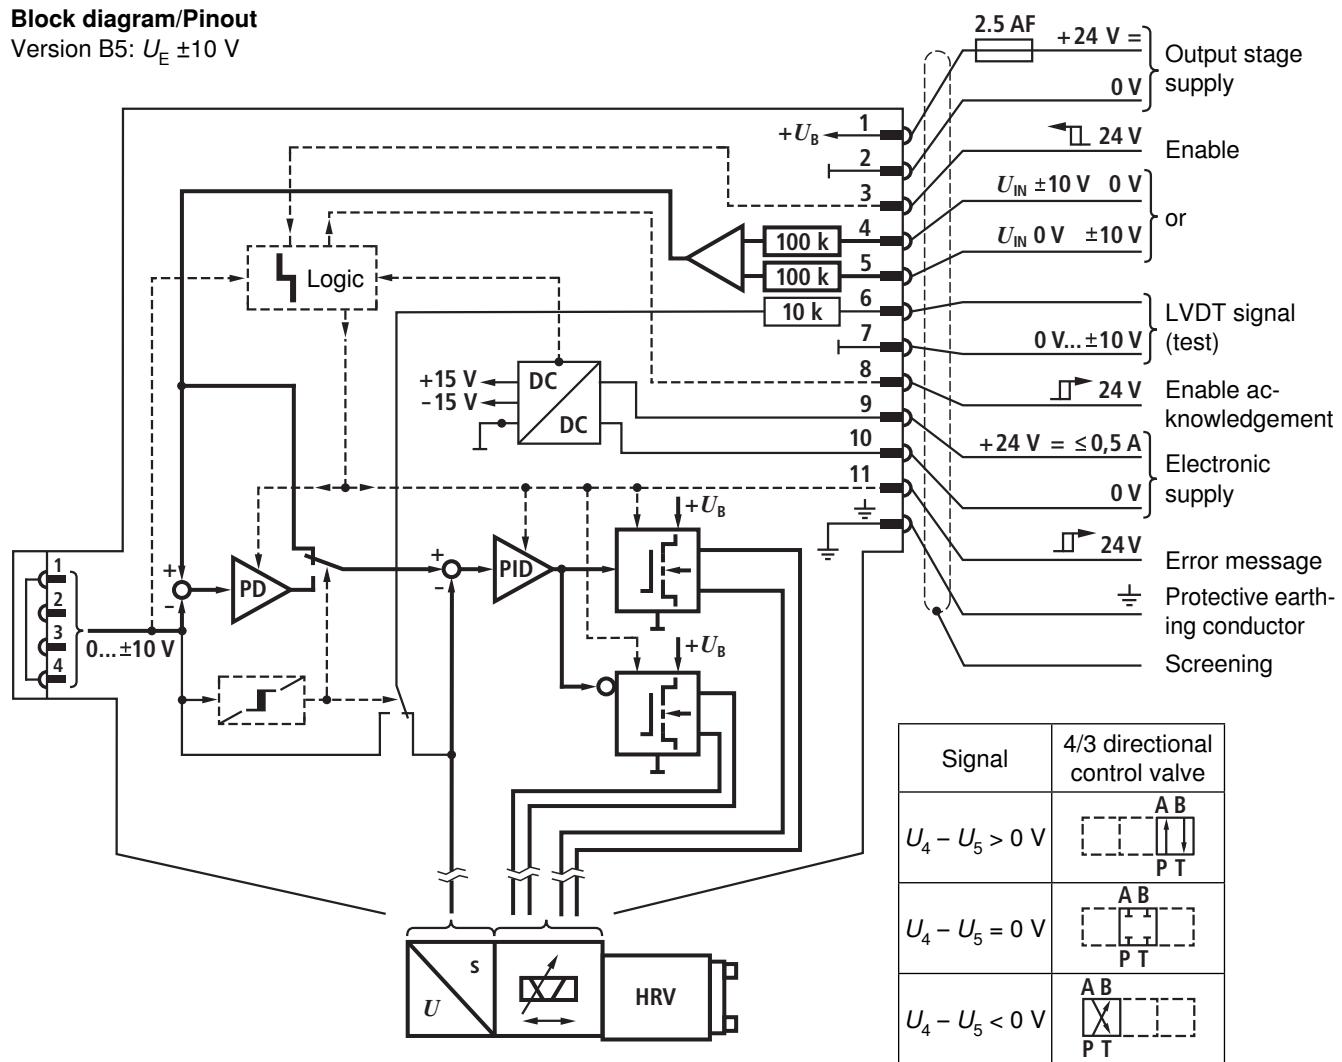

### Note

Electric signals taken out via control electronics (e.g. signal Actual value) may not be used for the switching off of safety-relevant machine functions!  
(See also the European standard "Safety requirements for fluid power systems and their components – Hydraulics", EN 982!)

## Integrated electronics

### Block diagram/Pinout

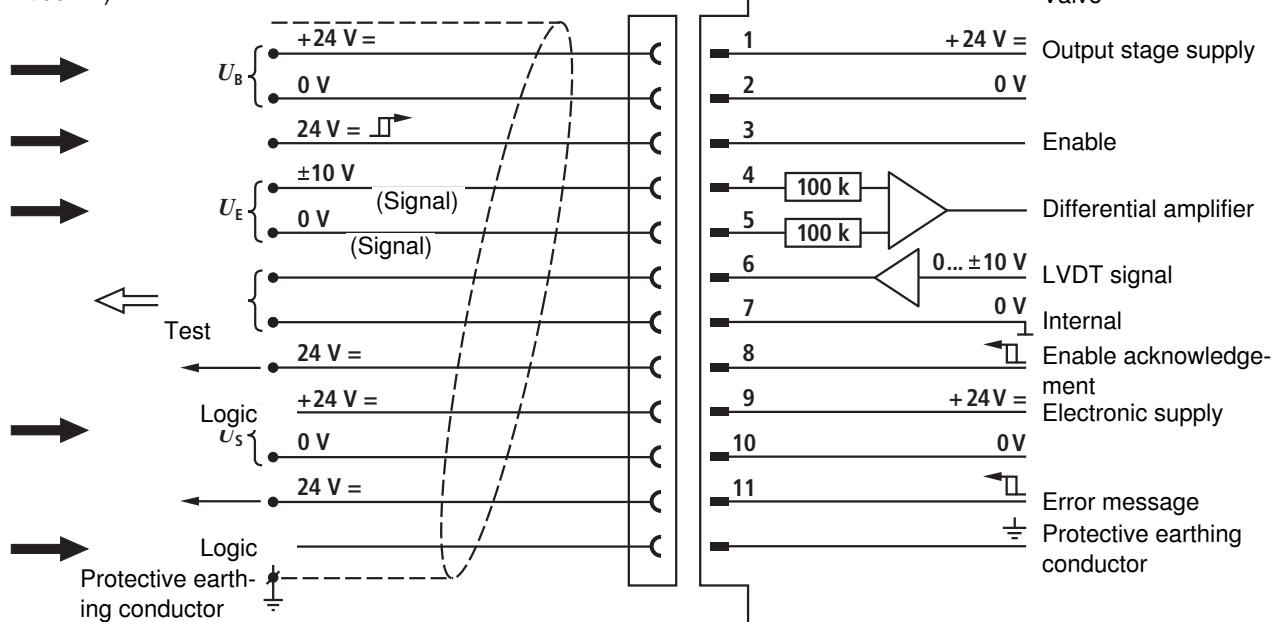

Version B5:  $U_E \pm 10 \text{ V}$

### Pin assignment 11P+PE

Version B5:  $U_E \pm 10 \text{ V}$

( $R_i = 100 \text{ k}\Omega$ )

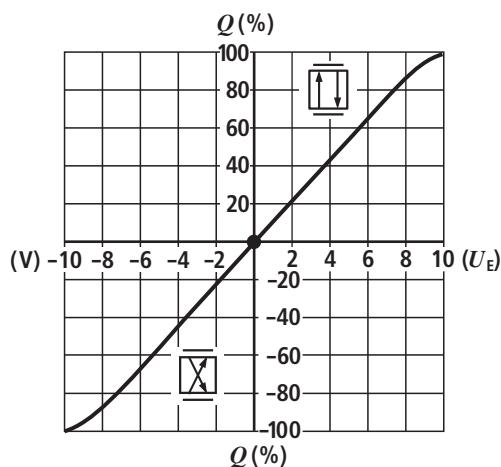

## Characteristic curves (measured with HLP 46, $\vartheta_{\text{oil}} = 40 \text{ }^{\circ}\text{C} \pm 5 \text{ }^{\circ}\text{C}$ )

Flow - signal function

$$Q = f(U_E)$$

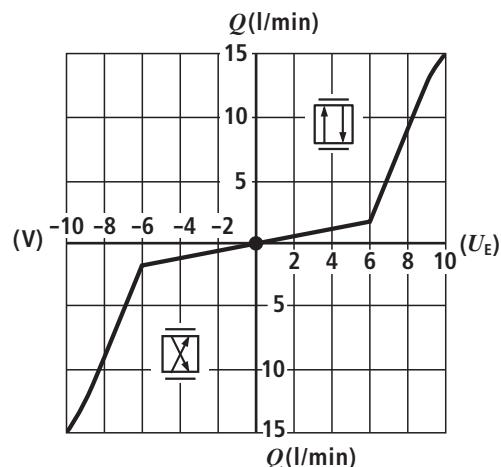

Flow characteristics

## Characteristic curves (measured with HLP 46, $\vartheta_{\text{oil}} = 40^\circ\text{C} \pm 5^\circ\text{C}$ )

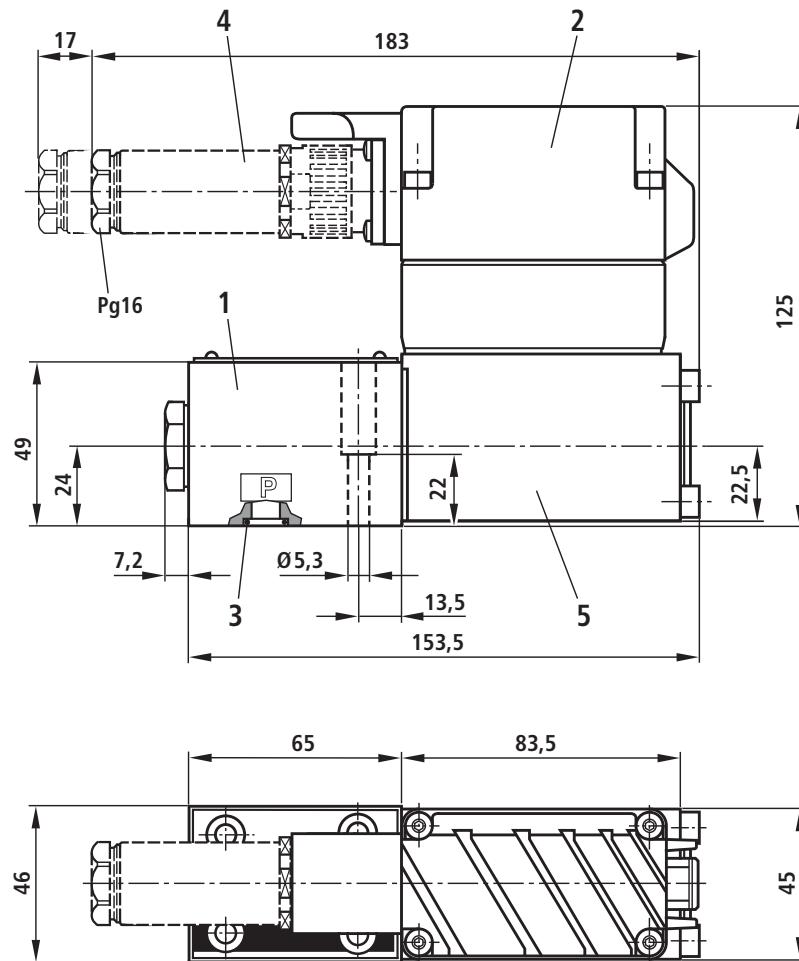

### Pressure gain

### Bode diagram

## Unit dimensions (dimensions in mm)

1 Valve housing

2 Integrated electronics

3 O-rings Ø 9.25x1.78 (ports P, A, B, T)

4 Mating connector no included in the scope of delivery, see technical data sheet RE 08008 (separate order)

5 Control solenoid with position transducer

6 Machined valve mounting face, porting pattern according to ISO 4401-03-02-0-05

Deviating from the standard:

Ports P, A, B, T Ø 8 mm

**Subplates** according to technical data sheet RE 45053 (separate order)

### Valve mounting screws (separate order)

The following valve mounting screws are recommended:

**4 cylinder screws ISO 4762-M5x30-10.9-N67F82170**

(galvanized according to N67F82170)

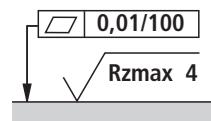

Tightening torque  $M_A = 6+1$  Nm

Mat.-no. 2910151166

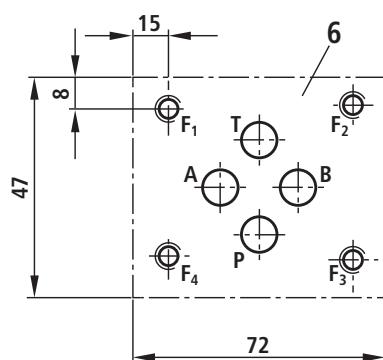

or

**4 cylinder screws ISO 4762-M5x30-10.9**

(friction coefficient  $\mu_{\text{total}} = 0.12-0.17$ )

Required surface quality of the valve mounting face
