## ENVIRONMENTAL TYPE RATINGS

	Enclosure Types
Type 1	Primarily indoor use to provide protection against contact with the enclosed equipment and against a limited amount of falling dirt.
Type 12	Indoor use to provide a degree of protection against dust, dirt, fiber flying, dripping water, and external condensation of non-corrosive liquids.
Type 3R	Outdoor use to provide a degree of protection against falling rain; undamaged by the formation of ice on the enclosure.

Description according to UL50E standard

## "IP" PROTECTION DEGREE TABLE

Protection degree against solid foreign object and against access to hazardous parts (1<sup>st</sup> numeral)

Protection degree against water (2<sup>nd</sup> numeral)

IP	Symbol	Description	IP	Symbol	Description
0		non-protected	0		non-protected
1		protected against solid foreign objects of 50 mm Ø or greater and against access to hazardous parts with the back of a hand	1		protected against vertically falling water drops
2		protected against solid foreign objects of 12.5 mm Ø or greater and against access to hazardous parts with a finger	2		protected against vertically falling water drops at any angle up to 15°
3		protected against solid foreign objects of 2.5 mm Ø or greater and against access to hazardous parts with a tool	3		protected against spraying water at any angle up to 60° from the vertical
4		protected against solid foreign objects of 1.0 mm Ø or greater and against access to hazardous parts with a wire	4		protected against splashing water from any direction
5		dust-protected and protected against access to hazardous parts with a wire	5		protected against water jets from any direction
6		dust-tight and protected against access to hazardous parts with a wire	6		protected against powerful water jets from any direction

Description according to rule CEI EN 60529

fan filters

Most of our products are available  
in the industrial engineering software:

# Air flow management

Increasingly often, the causes behind malfunctions or faults in electrical and electronic equipment housed in control panels or fitted as an integral part of a machine, are due to heat problems. In reality, the life span of components depends on the temperature and level of humidity inside the electrical cabinet.

The normal recommended average operating temperature inside a cabinet is 35°C with relative humidity of no more than 60%.

Fandis offers a wide range of solutions for efficiently disposing of dissipated heat from electrical components suitable for different applications.

## NATURAL CONVECTION

The use of exhaust filter ensures the passage of air and the removal of heat in a natural manner. This solution can be considered for dissipating low level of heat in dusty environments.

## FORCED CONVECTION

Forced ventilation is an inexpensive and efficient solution for preventing the formation of air pockets inside electrical cabinets. The best configuration includes fitting a fan filter to an exhaust filter.

The fan filter positioned at the bottom of the cabinet, takes in and filters air from the outside (standard air flow) while the exhaust filter at the top expels hot air. The pressure generated by the ventilation prevents unfiltered air from entering through holes or openings.

An inverted air flow version - reverse flow - is also available (fan filter at top and exhaust filter at bottom).

The system can be controlled by a thermostat that turns the fan on when high temperatures are detected.

Hot air can also be expelled from the roof of the cabinet if, for instance, the sides of the cabinet are covered by obstacles, walls or by the sides of other cabinets. In a perfect configuration, an exhaust filter is positioned at the bottom of the cabinet. The lower pressure generated by the roof unit sucks in air from the outside through the exhaust filter to enhance internal air flow and the dissipation of heat.

The use of a swivelling fan is an alternative solution for a better air circulation inside the electrical cabinet.  
This fan distributes heat to reduce the temperature, cools local hot spots and disperses cold air emitted by cooling units.

# EMC shielding

Electromagnetic compatibility, or EMC, relates to the unintentional generation or reception of electromagnetic energy that may lead to electromagnetic interference with a component or item of equipment. By incorporating EMC into electrical component design, electronics engineers can ensure the long-term stability and lifespan of multiple electrical components operating within a given space.

The EMC shielding of an enclosure guarantees both limited radiated emissions and protects internal components from external sources of interference.

Fandis EMC filters and fan filters are designed to prevent the weakening of the shielding effect in enclosures with a high level of protection, even with cutouts, and to maintain this status.

## FAN FILTERS

Fan filters are a practical solution for removing heat from the cabinet. They channel filtered ambient air into the enclosure, expelling warm internal air through an exhaust filter or roof unit to reduce temperatures and protect electronic components from overheating.

Fandis offers three different series of fan filters to better satisfy various cooling and ventilation requirements.

### FF SERIES

#### TIME-SAVING INSTALLATION

Quick tool-less mounting system with clips for 1 to 3.7mm thick plates

#### QUICK CONNECTION

Cage clamp free-tool wiring system

#### IP55 AND TYPE 3R (OPTIONAL)

Ideal for indoor or outdoor use in harsh industrial environments

#### EMC-COMPATIBLE

Metal shielding for electromagnetic protection

#### SLIDE OPENING

Easy replacement of the filter media without the need of tools

#### COLORS

Custom RAL colors subject to minimum order

#### Details that make the difference

## ■ FPF SERIES

FPF fan filters are the first series of Fandis filtering solutions for enclosures. These units have a low external profile to avoid obstruction and are easy to mount on standard panel cutouts with a fast snap-on assembly. An integrated sealing gasket also provides secure dust and water protection.

**QUICK INSTALLATION**  
Snap-mounting system  
with elastic hooks

**EMC-COMPATIBLE**  
Metal shielding for  
electromagnetic  
protection

**IP55 PROTECTION (OPTIONAL)**  
Ideal for harsh ambient condition in  
industrial applications

## ■ GF SERIES FAN FILTERS

The GF fan filter range is characterized by an innovative mounting system with jacks, which accommodate both plastic and plate enclosures with thick wall applications.

This series has the advantage of a fast outer installation, without extra drilling, and an easy filter replacement through the original hinged protection guard.

**FIXING WITH JACKS**  
Patented system for thick wall  
applications in both plastic and  
plate enclosures (up to 16mm)

**HINGED OPENING**  
Easy tool-less replacement of the  
filter media through the hinged  
protection guard

## General specifications

- Mounting without screws in square openings as indicated in the cut-out diagram
- Plate thickness: FF08 from 1 to 2mm; FF12, FF13 from 1.3 to 3.2mm; FF15, FF20 from 1.3 to 3.7mm (up to 4mm with cut-out max tolerance)
- Plastic parts in PC/ABS alloy, except elastic clips, made in PA66 GF13HSL
- Standard color RAL 7035, other colors available on request, subject to quantity
- Permanent sealing gasket in polyurethane foam
- Filter media in thermo-linked progressive structure synthetic fibre
  - filter class G3 (optionally filter class G4), according to EN 779
- Filter media can be cleaned, up to 10 times by washing, blowing dry and lightly beating
- IP55, Type1, 3R and EMC versions on request
- UL approval according to UL 508 and CSA approval according to CSA/CAN 22.2 No. 14

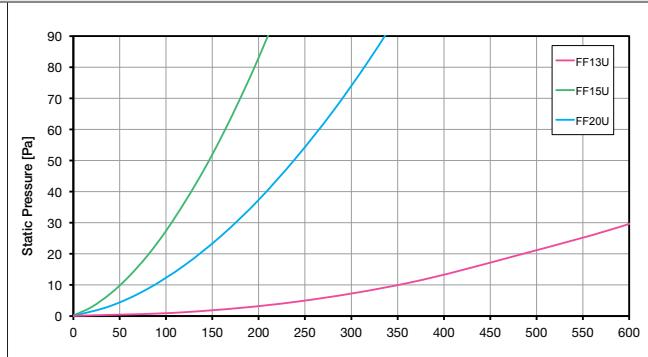

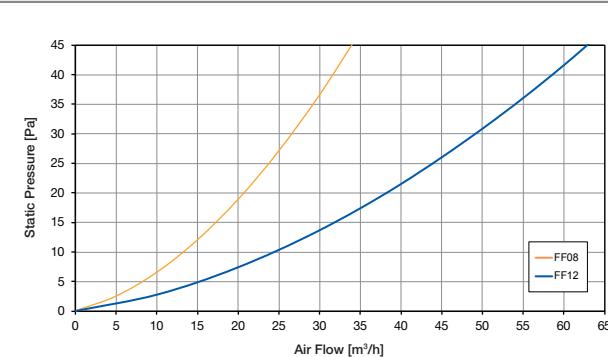

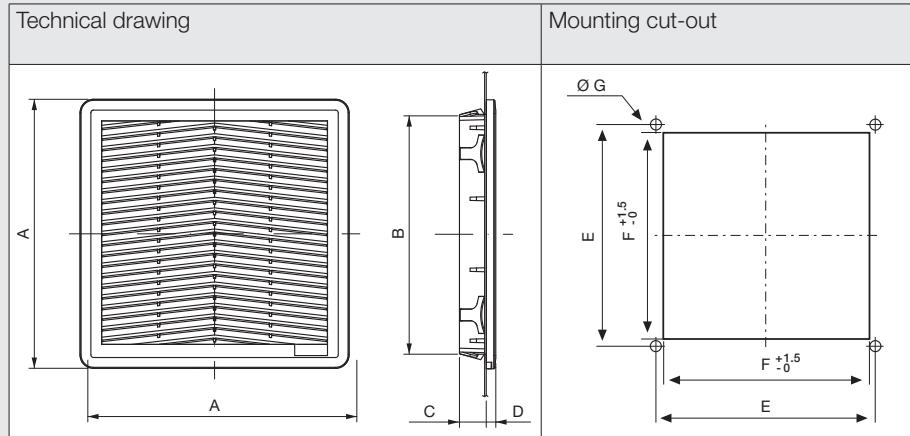

- Clip mounting system  
► Easy media replacement

- Low profile

- Mounting without screws in square openings as indicated in the cut-out diagram
- Plate thickness from 1 to 2mm
- Plastic parts in PC/ABS alloy, except elastic clips, made in PA66 GF13HSL
- Standard color RAL 7035, other colors available on request, subject to quantity
- Permanent sealing gasket in polyurethane foam
- Filter media in thermo-linked progressive structure synthetic fibre  
- filter class G3, according to EN 779
- Filter media can be cleaned, up to 10 times by washing, blowing dry and lightly beating
- Type1, 3R and EMC versions on request

## Technical specifications

## General specifications

- Mounting without screws in square openings as indicated in the cut-out diagram
- Plate thickness from 1.3 to 3.7mm (up to 4mm with cut-out max tolerance)
- Plastic parts in PC/ABS alloy, except elastic clips, made in PA66 GF13HSL
- Standard color RAL 7035, other colors available on request, subject to quantity
- Permanent sealing gasket in polyurethane foam
- Filter media in thermo-linked progressive structure synthetic fibre
  - filter class G3 (optionally filter class G4), according to EN 779
- Filter media can be cleaned, up to 10 times by washing, blowing dry and lightly beating
- IP55, Type1, 3R and EMC versions on request
- UL approval according to UL 508 and CSA approval according to CSA/CAN 22.2 No. 14

## Technical specifications

## General specifications

- Mounting without screws in square openings as indicated in the cut-out diagram
- Plate thickness from 1.3 to 3.7mm (up to 4mm with cut-out max tolerance)
- Plastic parts in PC/ABS alloy, except elastic clips, made in PA66 GF13HSL
- Standard color RAL 7035, other colors available on request, subject to quantity
- Permanent sealing gasket in polyurethane foam
- Filter media in thermo-linked progressive structure synthetic fibre
  - filter class G2, according to EN 779
- Filter media can be cleaned, up to 10 times by washing, blowing dry and lightly beating
- EMC versions on request
- UL approval according to UL 508 and CSA approval according to CSA/CAN 22.2 No. 14

## Technical specifications

## Standard flow / Reverse flow

## General specifications

- Mounting without screws in square openings as indicated in the cut-out diagram
- Plate thickness between 1.5 and 2.2mm
- Plastic parts in PC/ABS alloy
- Permanent sealing gasket in polyurethane foam
- Filter media in thermo-linked progressive structure synthetic fibre
  - filter class G3 (optionally filter class G4), according to EN 779
- Filter media can be cleaned, up to 10 times by washing, blowing dry and lightly beating
- IP55, Type1, 3R and EMC versions on request
- UL approval according to UL 508

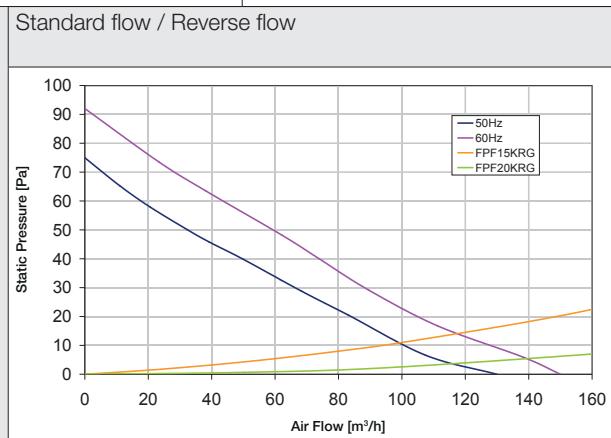

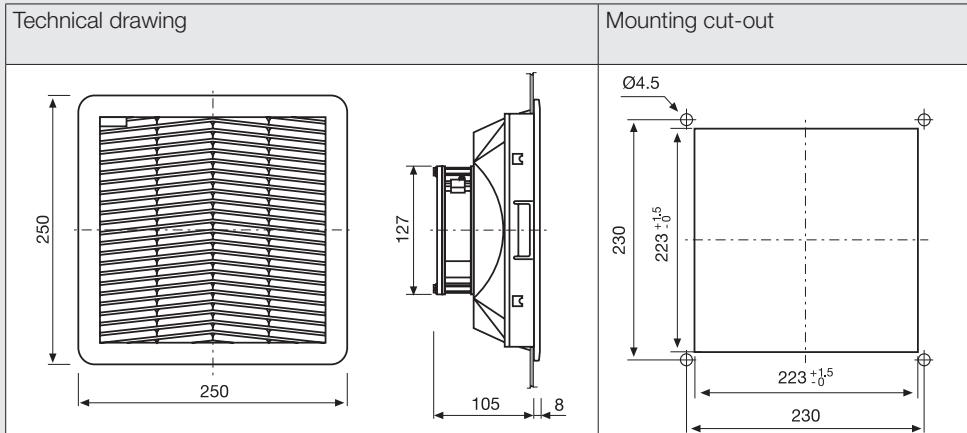

- Clip mounting system  
► Low profile

### Technical specifications

Standard flow / Reverse flow

- Fixing system with jacks (international patent)
- Ideal for plastic or plate enclosures
- Easy media replacement
- Low profile
- Media replacement without tools

## General specifications

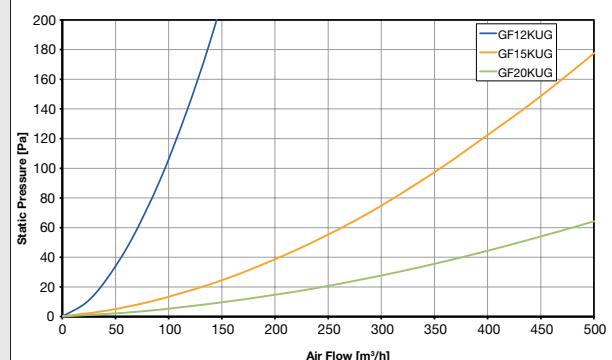

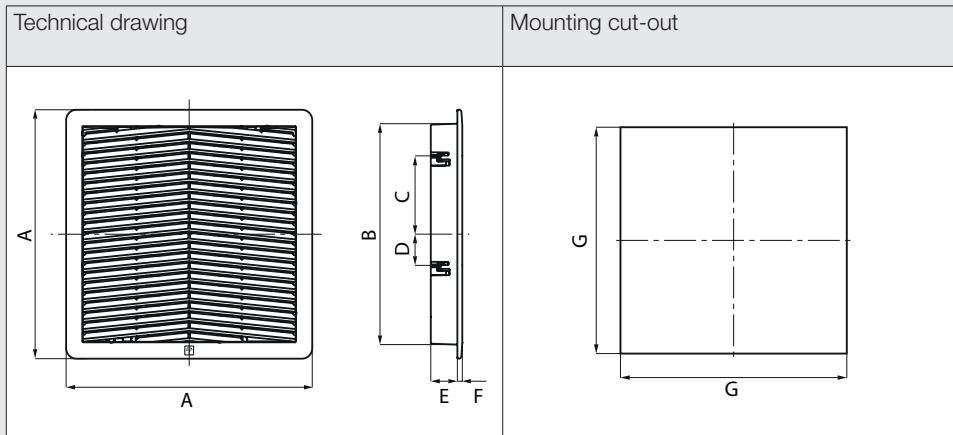

- Mounting without screws in square openings as indicated in the cut-out diagram
- Plate thickness thickness up to 8mm and by cutting the jacks up to 16mm
- Plastic parts in PC/ABS alloy
- Standard color RAL 7035, other colors available on request, subject to quantity
- Permanent sealing gasket in polyurethane foam
- Filter media in thermo-linked progressive structure synthetic fibre
  - filter class G3, according to EN 779
- Filter media can be cleaned, up to 10 times by washing, blowing dry and lightly beating

## Technical specifications

## ROOF EXHAUST UNITS

Roof exhaust units are commonly used in restricted spaces to dissipate hot air that is extracted from the top of enclosures.

These units can be provided with an exhaust filter for either convection cooling or forced air-cooling in combination with a fan.

### ■ TP SERIES

**CASING MATERIAL**  
Plastic structure with aluminum top

**PROTECTION**  
Available in 4 different protection classes

**VENTILATION**  
Natural air convection or forced air sucking

### ■ T SERIES

**CASING MATERIAL**  
Metal structure

**HIGH PERFORMANCE VERSION (T22)**

### ORIENTABLE FAN

The orientable fan is designed to be mounted vertically or horizontally to eliminate hot spots and ensure distribution of air inside the enclosure.

#### SIMPLE POSITIONING

Adjustable in 2 axis

#### QUICK CONNECTION

Cage clamp free-tool  
wiring system

## General specifications

The adaptor is a plastic frame, which allows the fan filter installation in a semi built-in position in the electric cabinet, reducing the internal dimensions.

- Available for FF, FPF and GF series in 150x150mm, 204x204mm and 325x325mm sizes
- Standard color RAL 7035 and 7032 grey, other colors on request

### Technical specifications

FPFA12	FPFA15	FPFA20

## General specifications

The stainless steel cover is particularly suitable for outdoors applications or in the food industry. This cover protects against splashing water and solid foreign objects and it is easily washable.

- Available for FF, FPF and GF series in all sizes
- AISI 304 stainless steel cover of 1mm with bayonet joint on support
- Stainless steel support of 0.6mm to apply between base and clips

### General specifications

An handy accessory for documents storage, this holder can be easily fixed on the enclosure door through a pre-arranged double side adhesive tape.

- Material: PC/ABS alloy
- Holds documents in A4 format
- Standard color RAL 7035

### Technical data

#### Model

TPD-A4

### General specifications

The pressure compensation device avoids the pressure compensation for temperature fluctuations across the seal. Air pressure changes are compensated and the ingress of dirt and water is prevented.

- Fixing system: PG29, Ø37mm
- Easy installation to any cabinet, even retrospectively
- Standard color RAL 7035

### Technical data

#### Model

CP-U55-00

## General specifications

The filter media are made of high performance nonwovens produced from elastic, break-resistant polyolefin fibers with thermal bonding.

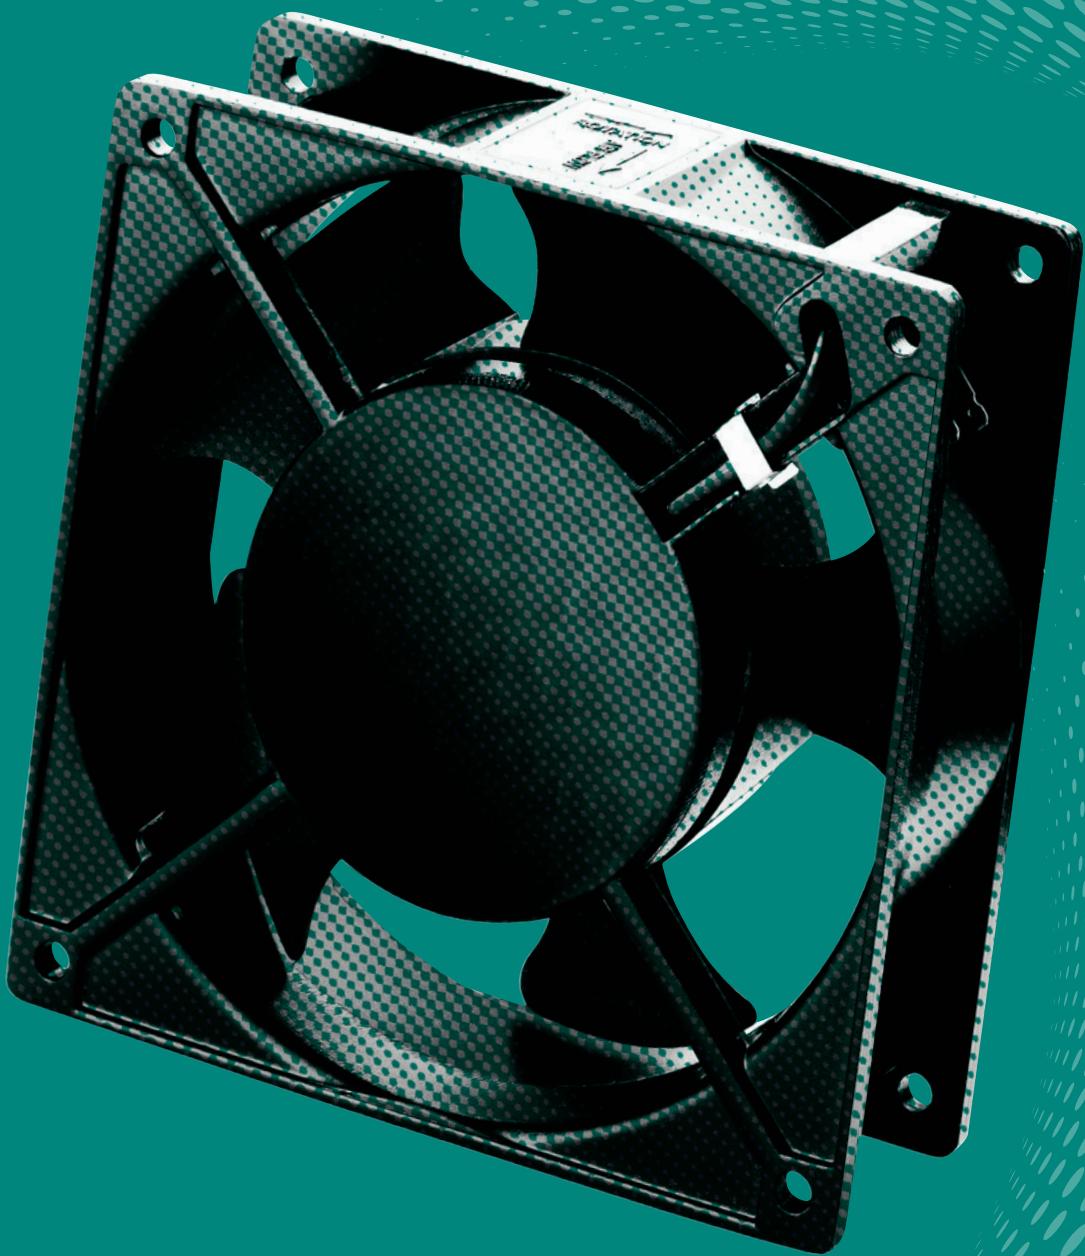

- High arrestance throughout their entire useful lifetime, thus providing maximized operational reliability
- The filter media can be cleaned, up to 10 times, by careful washing, blowing dry and lightly beating
- Available for FF, FPF and GF series in all sizes
- G4 not for FF08 and FPF08 models

► 6 pcs. kit

## STANDARD FRAME FANS

Axial fans and blowers provide forced-air cooling solution to temperature-sensitive applications. The large airflow and low noise axial fans are designed for ventilation and spot cooling of internal machinery components, especially in areas with confined spaces. Blowers, on the other hands, produce more concentrated airflow and are suitable to work with high impedance systems. A variety of AC, DC and energy-efficiency EC fans in different sizes, air volumes and pressures satisfies each industrial requirements.

### MOTOR TYPE

AC shaded pole or capacitor, or alternatively with brushless DC motor

### ELECTRICAL CONNECTION

Wires or terminal

### FAN DESIGN

With or without external casing

### SUPPORT SYSTEM

Long life ball bearing or quiet operation sleeve bearing

### ENERGY EFFICIENCY

EC green technology for high performance

### DC SIGNALS

Alarm or speed sensor provided by a separate wire

### Details that make the difference

Frameless version

Blower

Fan filter kit

## General specifications

- Casing in black die cast aluminum alloy
- Impeller in fibreglass reinforced PBT PC
- Shaded pole motor
- Impedance protected motor
- Electrical connection: 2 leads
- UL approval according to UL 507

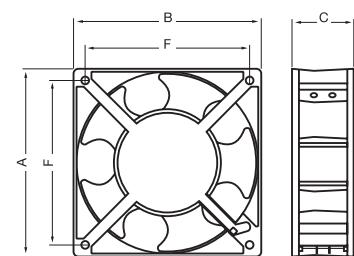

Class I

## Technical data

## Technical specifications

### Technical drawing

- ### General specifications
- Casing and impeller in black fiberglass reinforced PBT
  - Brushless motor
  - Impedance protected motor
  - Electrical connection: 2 leads
  - UL approval according to UL 507
- IP 20**

### Technical data

# EC technology

## WHAT IS EC TECHNOLOGY?

EC stands for Electronically Commutated and combines AC and DC voltages to bring the best of both technologies. The motor runs on DC, but with a normal AC supply. DC motors already have low power consumption but, if used in AC applications, need to convert AC to DC using a bulky, inefficient transformer. The EC fan incorporates voltage transformation within the motor. An electronic PCB board, which takes care of AC to DC transformation and houses the controls, is fitted to the non-rotating part of the motor (stator).

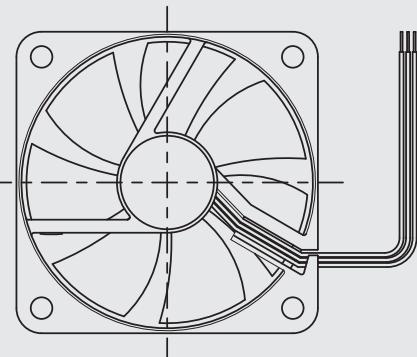

## PRINCIPLE

- Permanent-magnet brushless DC motor
- The stator is driven by electronic switches governed by a microcontroller
- AC operated (115/230Volts Single phase, 50/60Hz)

## BENEFITS

- Energy savings: minimum power consumption and better efficiency than equivalent AC fan
- Extended operating range (230 Vac 140~264Vac; 115 Vac 80~132Vac)
- Low motor temperature: for longer lifespan than AC equivalent
- Simplicity: electronic and power transformation are completely integrated within the motor
- High performance: better airflow and pressure values than an equivalent AC fan

# DC fans with signal lead

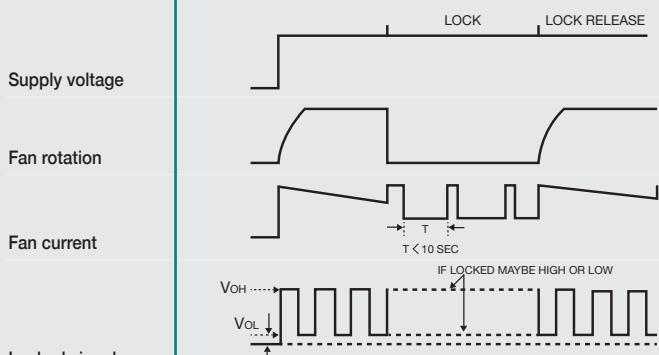

## DC fans with speed sensor signal

The integrated electronic sensor provides a square wave signal proportional to the fan speed. The signal is via a third lead wire (open collector type).

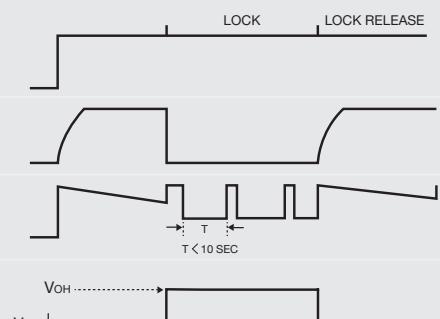

## DC fans with alarm signal

It is used to detect if the fan is still rotating or stopped. The output is via a third lead wire (open collector type) and it is a continuous high or low signal depending on the fan's type.

### Output Waveform Speed Control

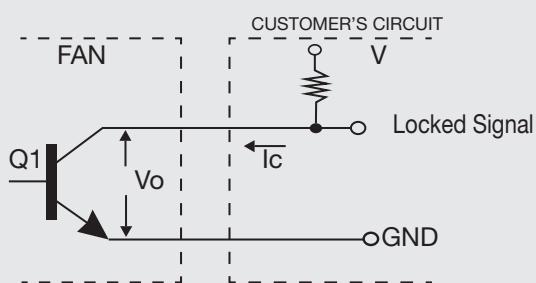

### Output Waveform Alarm Signal

The output waves may change depending on the fan type. For more information, contact our Sales Dept.

### Electrical diagram

External signal function design is decided by customer.

## SPECIAL FRAME FANS

Custom and special solutions include a full line of AC/DC fans tested to withstand harsh environmental and working conditions. They are dustproof and water jet resistance (IP55) or tolerate high temperature up to +90°C, also thanks to a particular all metal construction.

These special fans ensure safe, reliable operation and an extended service life of the devices.

### IP55

Ideal for indoor or outdoor use in harsh industrial environments

### ALL METAL

Robust metal fan blades for good corrosion resistance

### HIGH TEMPERATURE RESISTANT

Capable of running continuously at 90°C

Model numbering system for Special Frame fans

## General specifications

Class I

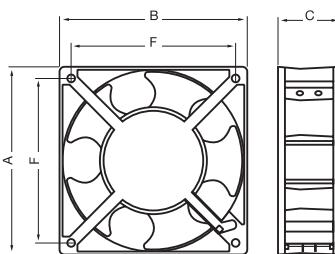

- Casing or housing cover (only for models A12WW and A12ZW) in black die cast aluminum alloy
- Impeller in fibreglass reinforced PBT PC
- Shaded pole motor
- Impedance or thermally protected motor
- Electrical connection: 2 leads or flat terminals

## Accessories - frame fans

### plastic rivets

### General specifications

- Fast fan and guards mounting
- Material: self-extinguishing nylon 6, according to UL 94V-0
- Suitable for fans with fixing hole diameter from 4mm to 4.8mm
- Available with round flat head or V-shaped head
- Two different stem lengths, 17mm and 22mm
- Color: black RAL 9005 or grey RAL 7032

## Accessories - frame fans

### elastic rivets

### General specifications

- Fast fan mounting and dismounting, vibration and noise reduction
- Material: EPDM rubber, 63 shore A hardness
- Color: black

Model
EAR4401N

## Accessories - frame fans

### fan power leads

#### General specifications

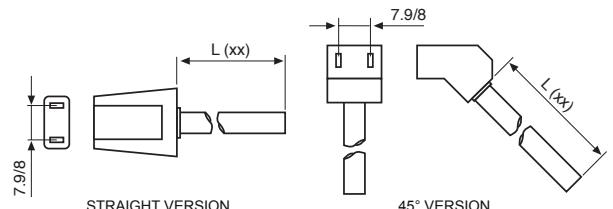

- Quick fans power connection or disconnection with standard terminal male plugs
- Plug material: self-extinguishing PVC
- Versions available:
  - straight plug connection
  - 45° plug connection
- daisy chain plugs for multiple connections
- Other lengths are available on request, subject to quantity
- Cable type: flat flexible wire without sheath, H03VH-H according to CEI 20-20 or equivalent
- Color: black

#### Technical data

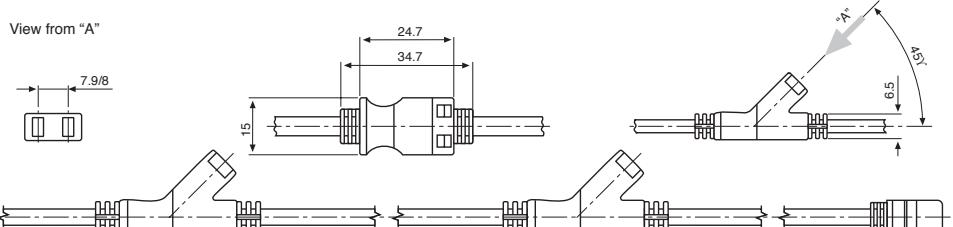

Model	Length of cable "L"	Description
	mm

**FUCSIS**  
anti-condensation heaters

Most of our products are available  
in the industrial engineering software:

## ANTI-CONDENSATION HEATERS

Heaters are used for warming up the air inside enclosures, protecting electrical and electronic components from condensation and corrosion. Fandis heaters have a self-regulating function that is designed to maintain optimal temperatures within enclosures.

### ■ H SERIES with cable and terminal block

#### TOUCH PROTECTION

Low surface temperature to keep safe maintenance operations (plastic version)

#### CASING MATERIAL

Metal or touch-safe plastic cover

#### SIMPLE MOUNTING

Clip fastening system for 35mm DIN rail

#### ELECTRICAL CONNECTION

Cable or cage clamp free-tool terminal

#### PRECISE CONTROL

Can be fitted with optional thermostat or hygrostat to monitor temperatures and humidity levels

#### Details that make the difference

Cage Clamp terminal

Touch Safe  
(plastic cover)

Clip system

## ■ H SERIES with fan

Heaters with built-in fans provide a forced air circulation to guarantee an even heat distribution in enclosures, thus minimizing the risk of condensation.

**THERMAL PROTECTION**  
Integrated device against overheating situation

**TOUCH PROTECTION**  
Low surface temperature to keep safe maintenance operations (plastic version)

**ELECTRICAL CONNECTION**  
Cage clamp free-tool terminal

**SIMPLE MOUNTING**  
Clip fastening system for 35mm DIN rail

**FAN**  
Long-life axial fan for evenly distributed air temperature

### Model numbering system for H SERIES

## Technical specifications

## ANTI-CONDENSATION HEATERS

The range of RAC anti-condensation heaters is designed with built-in temperature limiting PTC devices that prevent over-heating. This series protects cabinet components from the harmful effects of condensation and corrosion, keeping internal temperatures within acceptable operational limits. RAC heaters feature cable or terminal block connections and heating power from 15 to 150W.

### ■ RAC SERIES with cable

in the industrial engineering software:

# What is a thermoelectric unit?

A thermoelectric unit is a device for the transfer of heat. Such units come ready for fitting and cool using electrical energy only.

Thermoelectric units achieve the same results as traditional compressor systems without the use of gas or moving components (except fans, if applicable).

## HOW DO THERMOELECTRIC UNITS WORK?

Thermoelectric units are simply small static heat pumps, which use the so-called "Peltier" effect.

Heat is transferred as a result of a flow of electrical current through thermoelectric modules, which are the main components in the system. Heat is absorbed by one side of the unit (the cold side) and as a result the temperature drops. The other side dissipates the heat into the surrounding environment (hot side). The process can be reversed by simply inverting the direction of the current flow.

## WHAT ARE THE ADVANTAGES COMPARED TO A COMPRESSOR SYSTEM?

Thermoelectric units have no moving mechanical parts (except fans, if applicable) and are therefore extremely reliable, have an almost unlimited life span and require no maintenance.

The fact that they are "static" makes them immune to vibration meaning they can be used in any position, which makes them particularly suitable for applications where they are mounted on systems in motion.

They contain no pollutants such as CFC or other gases, which can harm the environment ambient and have simpler and more compact structure than compressor systems.

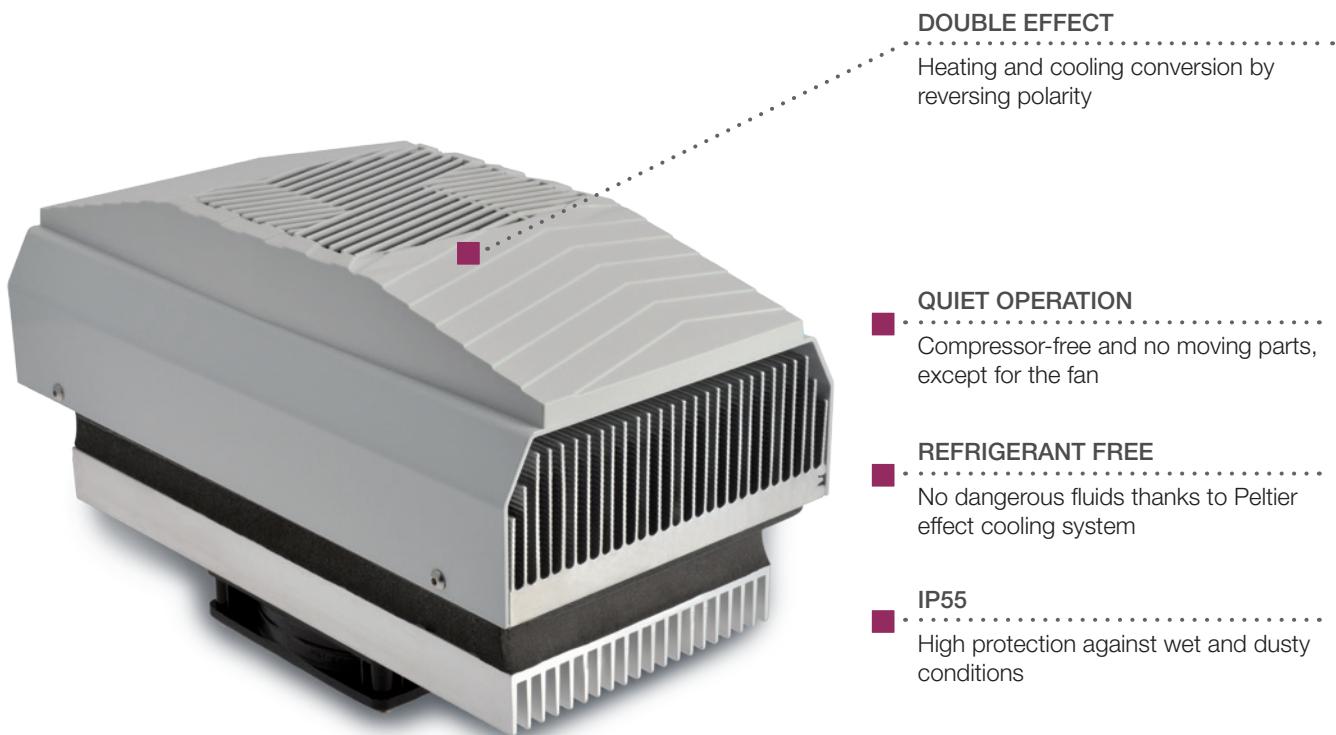

Thermoelectric cooling units are used to cool and dehumidify the air inside electrical cabinets and to separate the internal and exterior environments.

Air conditioners are usually used when outside temperatures are unfavorable i.e. over 35°C and the atmosphere is contaminated by oil or dust.

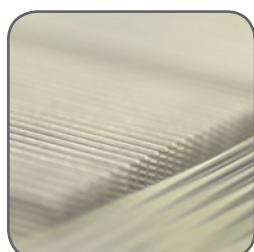

## THERMOELECTRIC UNITS

Thermoelectric unit is a solid-state device, which can operate as a heat pump to transfer heat utilizing the Peltier effect. These thermoelectric air conditioners represent a cost-effective solution for cooling electronic equipment housed in small enclosures to provide reliable performance without the use of CFC's.

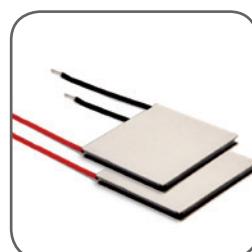

### ■ DC THERMOELECTRIC UNITS

#### Details that make the difference

Efficient heat sink

Peltier module

Custom design

## ■ AC THERMOELECTRIC UNITS

Designed for enclosure in industrial settings, the AC cooling unit fit an integrated AC power supply system on the outer cover, saving internal space and avoiding additional thermal load inside the unit.

AC/DC POWER SUPPLY INTEGRATED

### DESIGN

Corrosion-resistant stainless steel construction

## THERMOELECTRIC MODULES

Thermoelectric modules are semiconductor-based electronic components that work as a small heat pump. These modules are the core system of thermoelectric units and combine low energy requirements with the ability to provide both cooling and heating from the same element, by reversing the polarity of DC voltage.

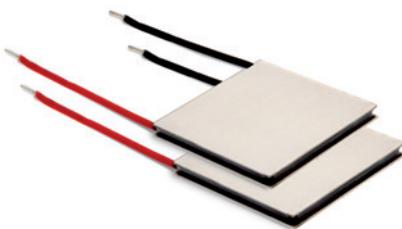

### DOUBLE EFFECT

Heating and cooling conversion by reversing polarity

### REFRIGERANT FREE

No dangerous fluids thanks to Peltier effect cooling system

## General specifications

The thermoelectric module (or Peltier module) is an electronic component which works as a small heat pump. This is the core system of the cooling unit and it is made up of a certain number of couples of semiconductor material with different electric charge. These couples are laid down between two ceramic plates, like a "sandwich", that act as a mechanical support and also as an electrical insulator. Applying a DC electric current to the module, the system starts to work cooling a side of the module and warming the opposite one.

- Lead wires length: standard 150mm
- Tinned lead wires ends
- Lead wires insulation: PVC
- Sealing: silicone or epoxy resin

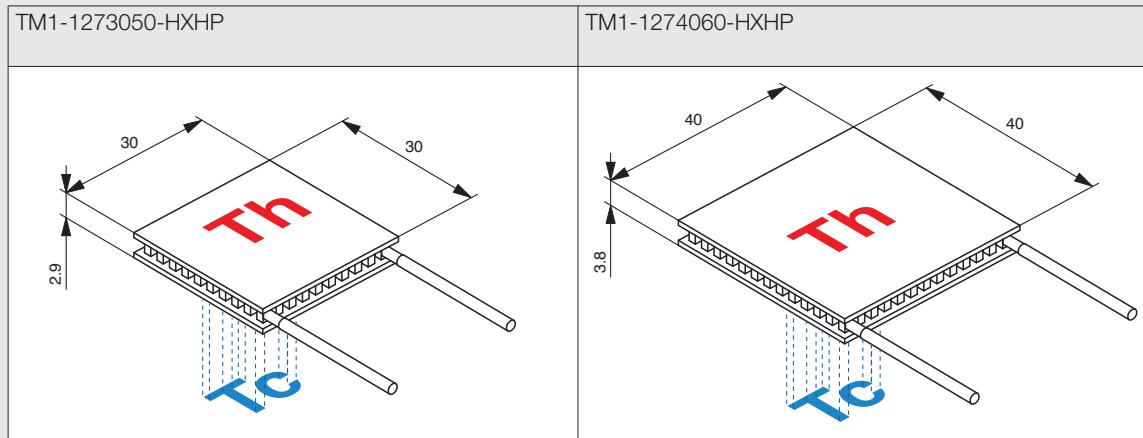

- No chlorofluorocarbons (CFC)
- Ability to heat and cool
- Precise temperature control

- Operation in any orientation
- Long life
- Not sensitive to vibration

REGULATORS

Most of our products are available  
in the industrial engineering software:

## MECHANICAL REGULATORS

Temperature and humidity regulators help to guarantee the optimal conditions inside the enclosure for trouble-free operations with electrical components.

They are used for controlling fan filters, heaters or for switching signal devices.

### ■ NO-NC THERMOSTATS

#### VERSIONS

Available with normally closed, normally open and change over contacts

#### SET POINT

Wide temperature setting range with Celsius or Fahrenheit scales

#### ELECTRICAL CONNECTION

Screw terminals

#### SIMPLE MOUNTING

Snap-on fastening system for DIN rails

#### APPLICATIONS

Switching contact for fan filters, heaters and cooling unit or signal devices

#### Details that make the difference

C° e F° scales

Disk setting by hand or tool

Patented clip system

## ■ TWIN THERMOSTATS

Twin thermostats integrate two independently switchable devices within one compact unit, allowing the simultaneous control of heating and cooling equipment or signaling equipment.

### SET POINT

Wide temperature setting range with Celsius or Fahrenheit scales

### VERSIONS

Available with  
normally closed/normally open,  
normally closed/normally closed and  
normally open/normally open contacts

### SIMPLE MOUNTING

Snap-on fastening system for 35mm DIN rails

### DUAL SYSTEM

Separate adjustment and operation

### APPLICATIONS

Switching contact for fan filters, heaters and cooling unit or signal devices

### ELECTRICAL CONNECTION

## ■ FLASHING SIGNAL DEVICE

Flashing devices ensure safety for enclosure inspections. They help prevent accidents by alerting operators when doors are opened or live voltage within the electrical system through flashing lights.

### VISUAL SIGNAL

3 red flashing lights indicating live voltage presence

### AUXILIARY CONTACTS

Can be integrated with a limit or interlock switches

### CLOSE DOOR SIMULATION

Power is restored to permit maintenance operations

## General specifications

- Thermoplastic casing
- Fixing by screws (M4) or by adjustable bracket (FD02, FD03)
- Screw terminals for electrical connection:
  - flexible cable from 0.14mm<sup>2</sup> to 2.5mm<sup>2</sup>
  - rigid or tin cable from 0.14mm<sup>2</sup> to 4mm<sup>2</sup>
- CEI EN 60947-5-1, UL 508 applied standards
- Suitable for connection to single or three-phase systems

## Technical data

## ■ DOOR LIMIT SWITCHES

Limit switches are a practical solution for sensing applications in enclosures. They are mechanically activated to switch on the lamp or switch off live voltage inside the cabinet.

### VERSIONS

Different type of plungers and contacts

## General specifications

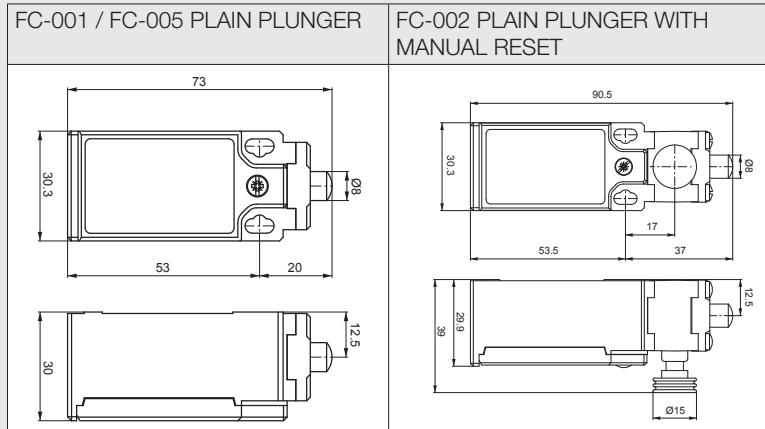

- Plastic casing
- Screws terminal for electrical connection and one cable inlet for PG13.5 cable gland
- IEC 947-5-1 / EN 60947-5-1 applied standard
- Fixing by No. 2 M4 screws
- Plain plunger (FC-001), plain plunger with manual reset (FC-002), roller plunger (FC-003), adjustable lever (FC-004), plain plunger with 3 NC contacts (FC-005)
- UL approval according to UL 508 and CSA approval according to CSA/CAN 22.2 No. 14

FC-002 PLAIN PLUNGER WITH MANUAL RESET

FC-003 ROLLER PLUNGER

FC-004 WITH ADJUSTABLE LEVER

## General specifications

Plastic support for a fast installation and a simple positioning of our FC series door limit switch.  
The kit consist of:

- n.1 slide for limit switch in PA6 H-V0
- n.2 screws for fixing to limit switch, tcb Phil ac 4.8 znb M4x30
- n.2 nuts M4

in the industrial engineering software:

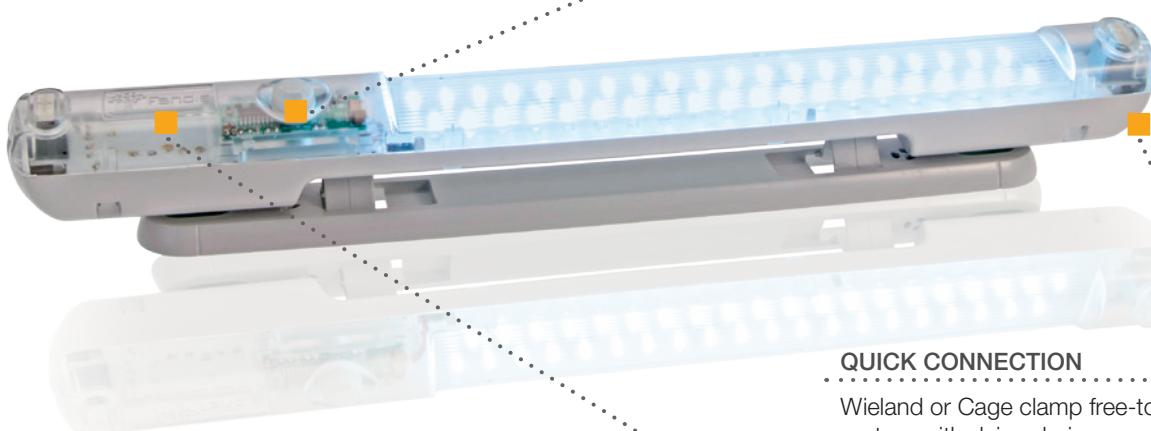

## ENCLOSURE LED LIGHTS

When carrying out maintenance in electrical enclosures, good lighting is essential in order to ensure optimal inspection and control conditions.

Fandis conventional fluorescent lamps and LED lights are specifically designed to maximize performance, brightness and energy saving.

### ■ FLL SERIES

#### ADJUSTABLE LIGHT BEAM

Variable beam direction of 40° per side for directing the distribution of light

#### FLEXIBLE INSTALLATION

Standard screw-in or, optionally, magnetic fastening for metallic surfaces

#### SWITCH

ON/OFF or PIR movement sensor

#### QUICK CONNECTION

Wieland or Cage clamp free-tool wiring system with daisy chain connection (up to 10 lamps)

#### LABEL DESIGN

Adhesive or in relief customized label

#### ENERGY EFFICIENCY

Long life and low consumption by LED technology

### Details that make the difference

Swivelling system

Cage Clamp or  
Wieland connection

Magnetic fixing

## ... OTHER LED LIGHTS

Fandis LED lamps are a durable and energy efficient solution for enclosure lighting. They offer longer service life and lower maintenance costs than fluorescent systems.

### CLG-L SERIES

**SIMPLE POSITIONING**  
Metal fixing brackets  
for an adjustable lamp  
fixing

**ENERGY SAVING**  
Long-life and low  
consumption by LED  
technology

<b>FAMILY</b> CLG-L = a.c. LED lamps		<b>RATED POWER</b> n or nn = absorbed power of lamp
		<b>RATED VOLTAGE</b> 30 = 115-230 Va.c.

## General specifications

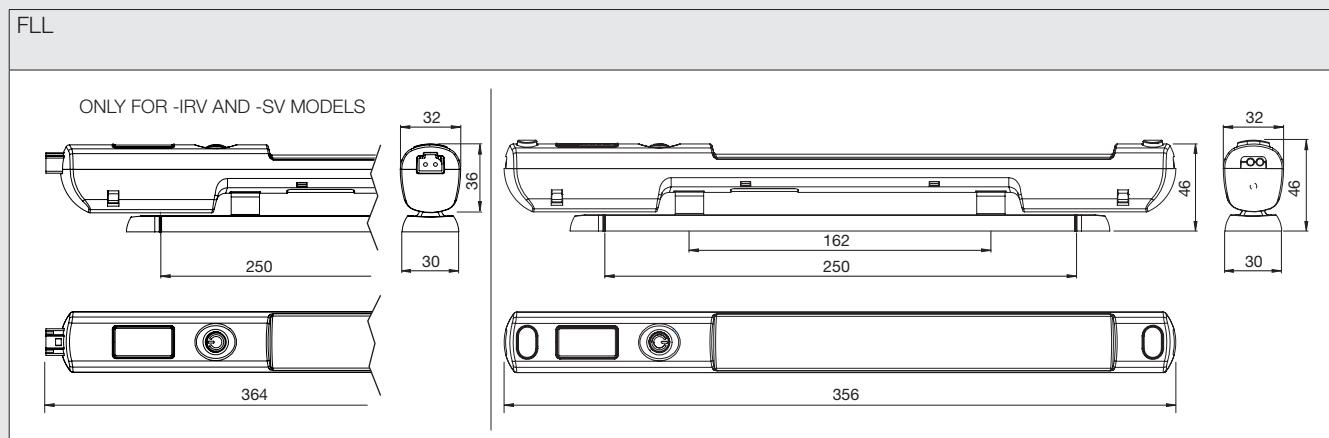

- Casing and protective lamp shield in polycarbonate (UL)
- Light color: daylight; color temperature: 7100K
- Built-in electronic ballast
- Brackets for enclosure with 25mm DIN frames
- Electrical connection: 2-poles cage clamp terminal or male connector (-IRV and -SV models). Female connector model CE-006WF on request.
- In compliance with EN 60598-1 standard
- Operating voltage range: 85-132 Va.c. (FLL-120 series); 173-265 Va.c. (FLL-230 series); 85-265 Va.c. (FLL-300 series)
- UL approval according to UL 508

## General specifications

- Casing and protective lamp shield in PC/ABS alloy
- Built-in electronic ballast
- ON/OFF switch
- Metal brackets for enclosure with 25mm DIN frames
- Electrical connection:
  - bipolar cable with terminal bushing, 1,800mm length
  - bipolar cable for multiple connection, 165mm standard length
- In compliance with EN 60598-1 standard

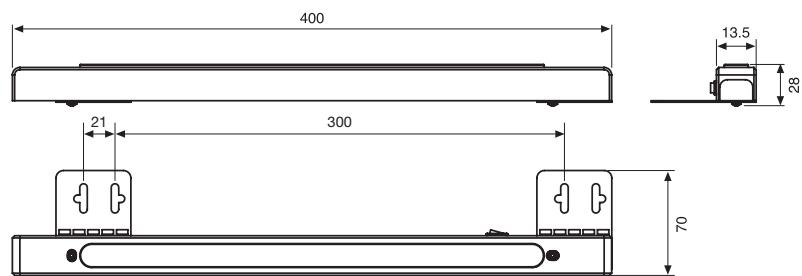

- Low energy consumption
- Orientable fixing brackets
- Daisy chain

## General specifications

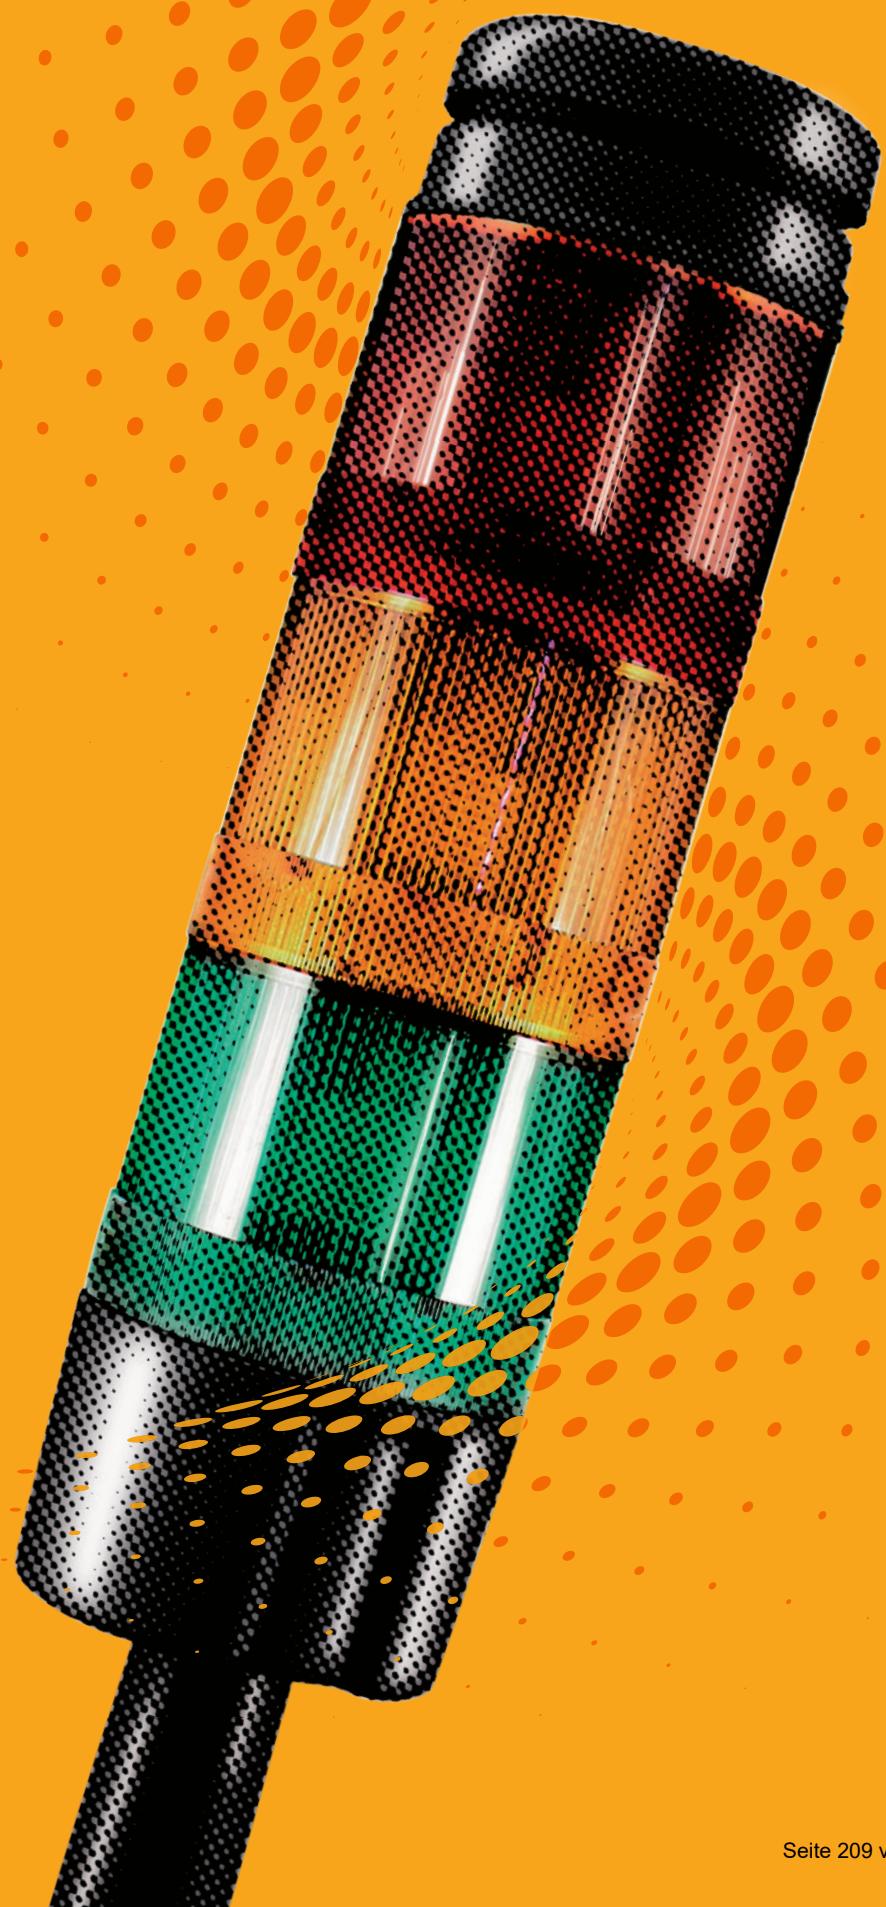

- White thermoplastic lamp casing for CLG-R and CLG-T models, steel plate white painted for CLG-S models
- Protective lamp shield in transparent thermoplastic material
- Equipped with fluorescent lamp type:
  - T5 with lamp holder G5 type for CLG-R models
  - T4 with lamp holder G5 type for CLG-T models
  - T8 with lamp holder G13 type for CLG-S models
- Built-in electronic ballast
- ON/OFF switch
- Electrical connection:
  - bipolar cable with terminal bushing for CLG-R and CLG-T models
  - 3-pole terminal block for CLG-S models
- In compliance with EN 60598-1 standard

Signal Towers .....	210
Accessories .....	216

**LUMEIS**  
signal towers

## SIGNAL TOWERS

Signal towers are important optical and acoustic accessories for protecting the working environment and ensuring the efficiency of automated processes. These indicators provide alerts on anomalous situations and with regard to the machine's operating conditions.

### ■ ST70 SIGNAL TOWERS

#### MODULAR DESIGN

Up to 7 stackable elements

#### VISUAL AND ACOUSTIC VERSATILITY

Free combination of steady, flashing or rotating lights and buzzer

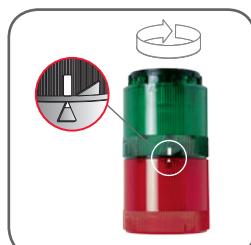

#### BRIGHTNESS

High performance LED or filament bulbs

#### EASY ASSEMBLY

Quick element joining using a bayonet system incorporating electrical and mechanical connection

#### Details that make the difference

Bayonet mounting

Foot/wall mounting

Flexible combination

## MODULAR STRUCTURE

Already equipped with cap, the acoustic element can only be mounted as a final top unit.

- Acoustic signal pulsating or continuous
- Sound frequency 2,900Hz approx.
- Signal repetition rate 0.5Hz
- Weighted sound pressure level measured at 1meter 90dB max
- Protection degree IP54
- Rated Voltage 24V AC/DC, 115/230V AC
- Current consumption 30mA (24V AC/DC) / 20mA (230V AC)

Color	Model	Rated Voltage
black	ST70-AN024-0	24V AC/DC
black	ST70-ANDV-0	115/230V AC

- Screw clamp terminals
- Maximum gauge 1.5 mm<sup>2</sup>
- Connection ID code C- common to all elements 1-7 refers to elements, from the base to the top
- Maximum voltage 240 V a.c./d.c.

Color	Model
black	ST70-CN-0

### Steady light element

- Illumination LED or filament bulb, not included
- Bayonet light bulb BA 15d - max. 5W
- Rated Voltage from 12 to 230V AC/DC
- Current consumption
  - 5W filament bulbs: 210mA (24V) / 43mA (115V) / 22mA (230V)
  - LED bulbs: < 50mA (24V) / < 18mA (115V) / < 17mA (230V)

blue	ST70-LBF-0
white	ST70-LWF-0

### Flashing light element

- Illumination filament bulb
- Bayonet light bulb BA 15d - max. 5W
- Rated Voltage 24V / 115V / 230V AC/DC
- Current consumption
  - 5W filament bulbs: 130mA (24V) / 25mA (115V) / 15mA (230V)
  - LED bulbs: < 50mA (24V) / < 18mA (115V) / < 17mA (230V)
- Flash frequency 1.4Hz approx. (84 flashes per minute), according to EN 60073 standard

Color	Model	Model	Model

### Multifunction LED light element

- Illumination 36 ultra-bright integrated LEDs
- Operating versions steady, flashing or rotating light element (to change the function just remove or shift the CN1 jumper)
- Rated Voltage 24V AC/DC
- Current consumption 55mA (24V DC) / 85mA (24V AC) - the same for all the illumination functions
- Flash frequency 1.4Hz approx. (84 flashes per minute), according to EN 60073 standard
- Rotation frequency 60rpm approx.

Color	Model
	24V AC/DC
red	ST70-LRM024-0

white	ST70-LWM024-0

### LED bulbs

- Life duration >25.000 hrs.
- Perfect functioning also in case of strong vibrations or hits.
- Low current consumption: <50mA (24V CA/CC) / <18mA (115V CA) / <17mA (230V CA)
- To be used together with alarm devices whose domes are of the same color as the LEDs.

**LIMITED LIABILITY AND WARRANTY DISCLAIMER**

The Manufacturer hereby makes no representation or warranties expressed or implied, statutory or otherwise. All implied warranties, including those of merchantability or fitness for use are hereby disclaimed.

The product is made in conformity with the cogent standards provided for by European Health and Safety legislation.

Where expressly indicated, the product conforms to the standard of Safety and Performance defined by recognised international bodies and subject to their periodic verification.

Any loss or damage, both incidental and consequential, for any failure to perform or delay to perform due to wrong use or wrong installation of the product, as well as to the non-observance of technical specifications, are not covered by the Manufacturer's warranty.

The buyer alone is responsible to determine the suitability of the product.

The data indicated in the catalogue is purely indicative. The product is subject to wear.

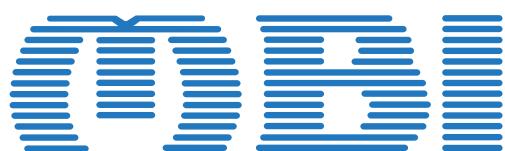

Electrical connections must be carried out in compliance with pertinent national, state or local health and safety laws.

If the apparatus in which the product is incorporated should guarantee continuous use without variation or interruption in performance, the product must be utilised only in the presence of a device which immediately signals any functional anomaly or arrest, allowing immediate intervention or the activation of an auxiliary product.

If installed and/or integrated in other apparatus, the use and maintenance manual of the apparatus must also indicate the correct use of our product and its working characteristics and must prescribe its estimated life, before the product actually reaches the maximum working hours shown in the data sheets, that is to say, taking account of all the specific conditions of use and of the technical specifications supplied and must supply exhaustive information allowing the user to substitute the product (removal & substitution).

Any fan found to be defective within the limits of the warranty, will be replaced free of charge. Costs of labour or other extra subsequent costs relative to the removal, restitution or new installation of the fan are not covered by the product warranty.

Sales Conditions and Data Sheets available on [www.mbi-gmbh.de](http://www.mbi-gmbh.de)
